

Ronald Langeveld

Senior Full Stack Software Engineer · 8+ years

Builds and ships production systems with React, Node.js, Python, and Rails — most recently as a Product Engineer at Ghost.

EXPERIENCE

Checkout Page · *Software Engineer* · Contract · Delaware, USA · Remote · Aug 2025 – Oct 2025

- Designed and shipped a Checkout Abandonment Recovery System — a 3-stage automated email campaign with smart user grouping, opt-out management, and conversion tracking — built in ReactJS, Next.js, and Node.js following Clean Architecture.

Ghost · *Product Engineer* · Full-time · Singapore · Remote · Jul 2022 – Aug 2025

- Rebuilt the Ghost Settings UI end-to-end, significantly improving usability, navigation, and the publisher experience.
- Heavily contributed to the Publishing team's rewrite of the Koenig editor — Ghost's core writing experience — using ReactJS and LexicalJS.
- Migrated critical parts of the publishing platform from legacy frameworks to modern stacks; worked across ReactJS and EmberJS in an open-source codebase via code reviews, RFCs, and async design.
- Participated in rotational on-call for production incidents and customer-impacting issues.

SAINT Solutions Africa · *Lead Full Stack Developer* · Freelance · Durban, SA · Remote · Feb 2018 – Present

- Lead developer for a multi-tenant cloud SaaS Maintenance Management System built with Node.js, ReactJS, Prisma, PostgreSQL, and Docker.
- Shipped Python and Node microservices for ERP automation and Fiix integrations with Sage, SAP, and Power BI.
- Maintain a Rails app that integrates with Fiix workflows.

Game Quitters · *Full Stack Developer* · Freelance · Singapore · Remote · Oct 2019 – Present

- Built an interactive learning platform with React, Node.js, and MongoDB. Maintain the SEO-optimized WordPress blog, forum, marketing site, and a custom Hobby Tool in ReactJS.

Kindbridge · *Full Stack Developer* · Freelance · Tennessee, USA · Remote · Jan 2021 – Mar 2022

- Full-stack Django scheduling app for mental-health therapists with Stripe payments, third-party integrations, and auth — deployed to AWS.

QuarterClub · *Full Stack Developer* · Freelance · Cape Town, SA · Remote · Mar 2021 – Jun 2022

- Lead developer for a hospitality social-network startup. Full-stack Django with Google/Facebook auth, Mailgun automations, and Payfast payments.

Earlier Feefty (Frontend, React/Next.js, 2021) · INTENTA (Stripe/PHP, 2020–21) · Hamster Capital (Lead Django, 2019, later acquired)

EDUCATION

Hankuk University of Foreign Studies · *International Studies (B.Admin minor)* · Seoul, South Korea · 2013 – 2016
